Handling 1 logs

```
rotating pattern: /app/projectview/logs/pms-server/access.log
/app/projectview/logs/pms-server/error.log
/app/projectview/logs/ph-server/access.log
/app/projectview/logs/ph-server/error.log
/app/projectview/logs/pms-nginx/access.log
/app/projectview/logs/pms-nginx/error.log
forced from command line (no old logs will be kept)
empty log files are not rotated, old logs are removed
considering log /app/projectview/logs/pms-server/access.log
Creating new state
Now: 2024-04-17 17:41
Last rotated at 2024-04-17 17:00
log needs rotating
considering log /app/projectview/logs/pms-server/error.log
Creating new state
Now: 2024-04-17 17:41
Last rotated at 2024-04-17 17:00
log does not need rotating (log is empty)
considering log /app/projectview/logs/ph-server/access.log
Creating new state

```

logrotate 설정 파일을 확인한다.

```

projectview@projectview:/app/installer$ cd /etc/logrotate.d/
projectview@projectview:/etc/logrotate.d$ ls
alternatives  appport  apt  bootlog  btmp  cups-daemon  dpkg  nginx  ppp  rsyslog
sane-utils  speech-dispatcher  ubuntu-advantage-tools  ufw  unattended-upgrades
wtmp
projectview@projectview:/etc/logrotate.d$ vi nginx

```

파일 내용은 아래와 같다.

```

/app/projectview/logs/pms-server/access.log
/app/projectview/logs/pms-server/error.log
/app/projectview/logs/ph-server/access.log

```

```
/app/projectview/logs/ph-server/error.log
/app/projectview/logs/pms-nginx/access.log
/app/projectview/logs/pms-nginx/error.log
